Statistical Basics for PhD Students, Part I

June 20 - July 25 2025.

The course is held as an online course.

The course is designed as the *Flipped Classroom* and is organized in the following way:

- The first meeting on Friday, June 20, is dedicated to clarifying the conditions and schedule of the course, as well as a brief introduction to R and R Studio.
- Every week on Fridays at 10 a.m. starting on **June 20**, the lecture notes and exercises on the topic
 of the current submodule are uploaded to StudIP for <u>self-study</u>.
- Until Thursday 10 a.m. of next week (the day before the submodule discussion), course participants must submit solutions to the exercises (as R code) and at least 3 questions/suggestions for the current submodule discussion.
- The online submodule discussion is held every Friday from 1 to approx. 3:30 p.m. The discussion is organized as a <u>targeted lecture</u> based on the questions/suggestions of the course participants. Participation in the module discussion is mandatory.
- In the case that questions arise during the homework, a question time in a virtual classroom is offered on Tuesday from 10 to 11 a.m. The participation in this question time is voluntary.

Important! Before starting the course, it is very recommended to check if the required time for self-study and homework is available.

The workload of the course (5 submodules) amounts to 90 h.

That includes:

15 h of attendance (6 meetings a approx. 2.5 h)

55 h of self-study and homework performance (approx. **11 h** weekly)

20 h for the final written presentation

Fulfillment of all course requirements results in 3 Credits.

Examination requirements: Written presentation of the own research project, addressing in particular the choice of appropriate statistical methods depending on data properties and objectives of the study and covering the methods of the 5 submodules attended.

Date	Place	Content	Time
20.06.2025	StudIP	Uploading the documents for the 1st submodule S1	10:00
20.06.2025	Virtual classroom	Welcoming and explanation of the course contents and conditions.	13:00-15:00
