

## Trainee (m/f/d) – Executive Support / Product Development / International Business

- 📍 Location: Germany-wide (Remote with occasional travel)
- 🕒 Start: Immediately or by arrangement
- 🌐 Company: UniferX International GmbH – [www.uniferx.com](http://www.uniferx.com)

### *Help shape the future of sustainable agriculture with us.*

*At UniferX, we believe that the future of agriculture must be both highly efficient and ecologically responsible. Our mission is to empower farmers worldwide through scientifically advanced biostimulants that strengthen crops, protect resources, and reduce environmental stress.*

*We are guided by values that define how we work and grow together: Passion, curiosity, and a spirit of discovery. Joy in change, agility, fairness, and empathy.*

*UniferX International GmbH develops, produces, and distributes – also in collaboration with third-party manufacturers – high-quality biostimulants and foliar fertilizers for sustainable agriculture, both organic and conventional. Invented, developed, and made in Germany. Our patented, future-oriented products from our own R&D startup are designed to combine maximum efficiency with environmental responsibility – boosting plant resilience, ahead of climate change.*

*To strengthen our small but agile team, we're looking for a forward-thinking talent who takes initiative, learns fast, and wants to grow with us – starting as a trainee with a clear path to a permanent role.*

### Your responsibilities – hands-on, strategic, international

- Support and monitor production processes at toll manufacturers – from planning and formulation to quality control
- Assist in the development and testing of new products in our technical lab
- Contribute to the expansion of our international business – including market research, analysis, and partner communication
- Support the executive team in day-to-day operations, project coordination, and strategic initiatives

### What you bring

- A completed or advanced degree – ideally in agricultural sciences, natural sciences, chemistry, or business
- A technical or scientific mindset with a strong interest in agricultural production and formulation technology
- An independent, solution-oriented working style with a hands-on mentality
- A genuine passion for sustainable innovation in agriculture
- Excellent command of English; additional languages (e.g., Spanish, Russian, Ukrainian) are a plus
- Alignment with our core values: passion, curiosity, spirit of discovery, joy in change, agility, fairness, and empathy

### What to expect

- Direct collaboration with the executive team – high visibility and a steep learning curve
- Broad insights into all business areas: product development, production, and international markets
- Creative freedom and the opportunity to implement your own ideas
- A growing international company with a future-focused product portfolio
- Flexible working hours, remote work options, and personal mentoring by one of the managing directors

### Interested?

We look forward to your application!
